

MTB GUIDE - NCC/TAXI - TAYLOR-MADE TOURS

3 OF THE MOST BEAUTIFUL VILLAGES IN ITALY

Long weekend by bike exploring Bienno in Camonica Valley,
Lovere and Monte Isola on Lake Iseo.

WHAT YOU WILL DISCOVER

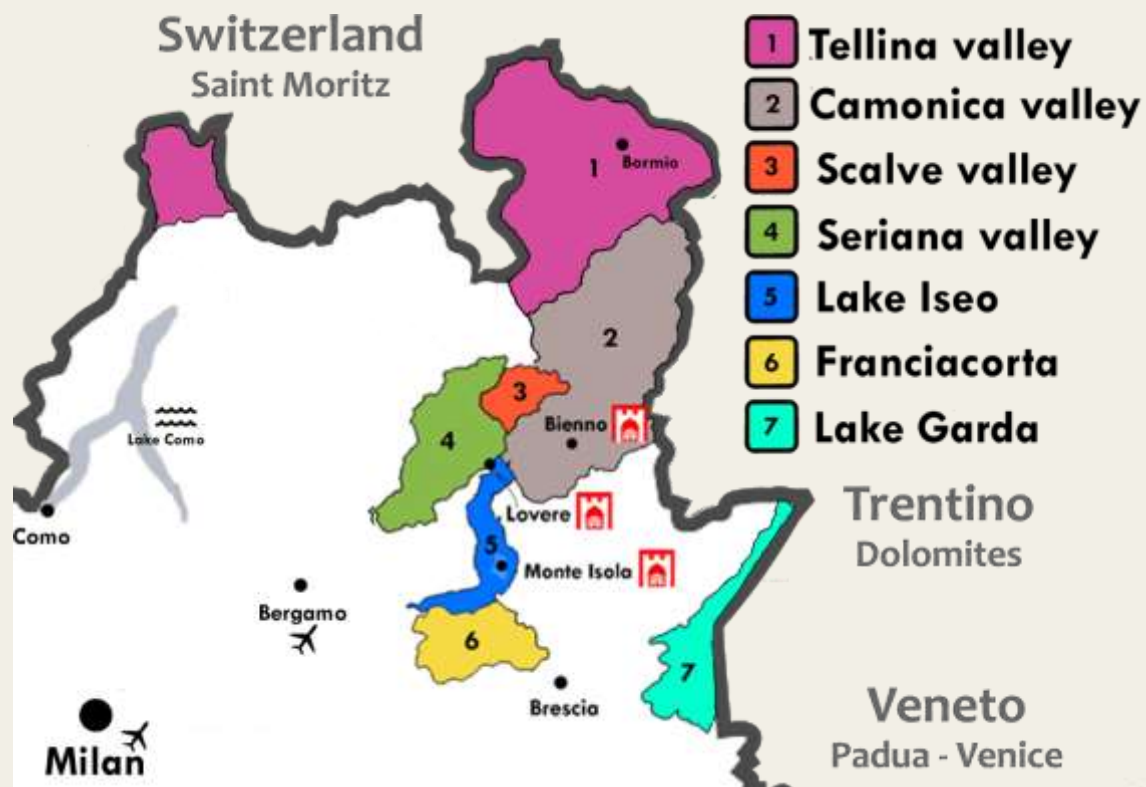

In this three-day tour you will discover three of the most beautiful villages in Italy.

Three ancient villages, rich in history and traditions, although very different and close to each other. You will travel in the two provinces of Brescia and Bergamo.

Bienna: in the heart of the middle Camonica Valley, cradle of craftsmanship, ironworking and water mills.

Lovere: a village perched on the Bergamo coast of upper Lake Iseo, which preserves a prestigious academy, medieval towers, a Basilica and Renaissance palaces, as well as a culture of water-sports including the historic rowing and sailing club.

Monte Isola, the largest inhabited lake island in Europe, with its fishing villages, its traditions of fishing and sardine drying and the production of nets and typical wooden boats.

VILLAGE N° 1

BIENNO

Departure at 9 am to visit one of the most beautiful villages in Italy,,: Bienno!

We'll reach this wonderful village pedaling along the Oglio river and then we'll continue visiting this interesting town and the things that this ancient village offers. The Camonica Valley has a long history of ironworking that still lives here, with hammers and forges that can still be seen scattered throughout the territory.

The grinding of wheat and the production of different types of flour, as well as the olive harvest or the production of craft beers.

Along the way you will visit one of the most beautiful churches in the Camonica Valley.

You will come back pedaling on the opposite side of the valley, the area where wine is produced. There are many wineries and viticulturists who are passionate about their work and produce wine; here we are at the end of this stage. Not far from here there is another beautiful place, Capo di Lago, a small village with few inhabitants built on the shores of Lake Moro, a small alpine lake of Camonica valley.

There are many legends and ancient ways of communication still built in Roman times.

Here, a renowned farmhouse sells wine and oil of their production. In the year 2021 the renowned guide “Gambero Rosso” has awarded 2 leaves out of 3 in the guide “Oli d'Italia 2021”, three of their oils.

VILLAGE N° 2

MONTE ISOLA

Come and discover by bike Monte Isola, one of the most beautiful villages in Italy.

Starting from Lovere, you will pedal partially along one of the two most characteristic shores of the lake, taking the boat to Monte Isola. The largest inhabited lake island in Europe, once known for the production of nets, and still today for the production of Gozzo Ligure (handmade wooden boat) for the delicious salami and sardines in oil.

From here we will continue our tour to discover this beautiful island.

Would you like to reach its 600 m high peak, which merges mountain and lake? Then we will reach the Sanctuary of the Madonna della Ceriola.

At the end of the bike tour in Monte Isola, we will take the boat again to get to the opposite shore, reaching Lovere again.

VILLAGE N° 3

LOVERE

Departure from Lovere, one of the most beautiful villages in Italy.

Visit of the town with a sightseeing tour around the village and some short stops to visit the Medieval and the Renaissance part. You will continue pedaling in a round trip tour on secondary roads not frequented with some stretches of dirt road in the woods and not difficult and short until you reach Clusone.

You will pass through some villages of the Borlezza Valley and upper Seriana Valley and some small tourist villages that were also home to famous artists.

You will admire the famous mechanical clock, Astronomical, Planetarium Fanzago made in 1583 still working.

You will continue pedaling through a forest until you reach a church that in the past had another function, we will continue our ride passing near the birthplace now a museum of a famous carver and so continuing to pedal we will arrive near the waters of the river Borlezza that still turn the blades of the mills, and here we are at the blue waters of Lake Iseo. How strange... here the same stream Borlezza is called Tinazzo!
